# Pharmacy

James

Key Worker

What should  
the pharmacist  
do?

He attends every day for his first week  
of supervised methadone

The following week he tells the  
pharmacist he has lost his prescription

What advice  
should the  
pharmacist  
provide?

The pharmacist continues to dispense  
and supervise daily methadone during  
James' early stages of treatment

What should  
the pharmacist  
do?

James starts to miss occasional days

James attends the pharmacy on Monday, then does not attend on Tuesday, Wednesday or Thursday

He comes back in on the Friday looking for his methadone

What should  
the pharmacist  
do?

James apologetically runs into the  
pharmacy at 5:58pm as the pharmacist is  
locking up

He has been encouraged to arrive  
before 5pm to allow staff to  
complete records before 6pm closing

What should  
the pharmacist  
do?

Due to major family stress, James  
buys heroin to use over the weekend

He walks into the pharmacy to  
request injecting equipment

What should  
the pharmacy  
team do?

James calls the pharmacy asking for  
naloxone because his partner may  
have taken an overdose

As far as the pharmacist knows his  
partner does not use heroin
