Integrated Health & Social Care Response

- Having the nurse as part of the team has helped break down barriers between health service staff and social care providers.

PREVENTION TYPOLOGY¹

1: universal preventing homelessness risk across the population as a whole. Including poverty reduction, affordable housing, employment and welfare.

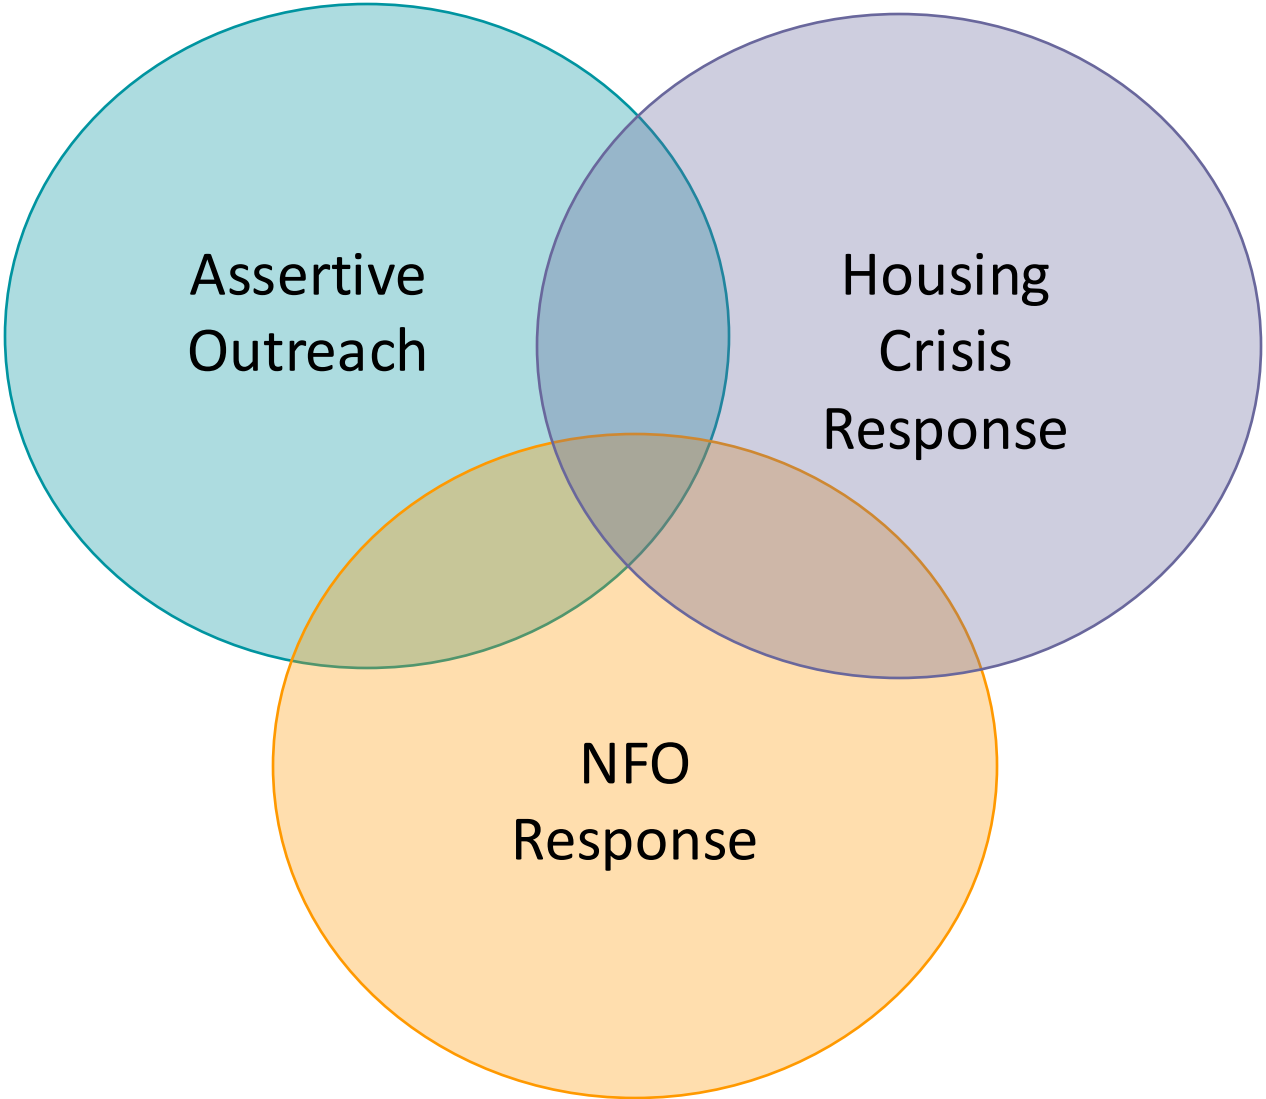

2: targeted early intervention focusing on **people and places** at the highest risk of homelessness – e.g. people leaving prison, young people leaving care, place-based approaches.

3: crisis people at imminent risk of homelessness (prevention duties within 6 months).

4: emergency people at urgent including same-day risk of rooflessness or homelessness.

5: repeat working with people who have previously been homeless to prevent the experience being repeated.
